With 10 years of experience in UI/UX design, I specialize in building interfaces for both digital products and integrated hardware-software systems. While working at **ASUS**, I was involved in motherboard application, smart home projects and smartwatch interface design. I've worked on varies of projects at **UserXper** include revamping the Land Bank's online banking app, creating a user-friendly interface for a biotech PCR testing machine, and designing a mobile app for LaYa Burger. Currently, I'm a product designer at a blockchain company where I'm building a crypto DEX and contributing to various other blockchain-based products.
